**BYC<sup>2</sup> - Build Your Customer Care Center**

**SIM-Kiosk** is a self-service kiosk machine that can be located in customer care lobbies, airports and other applicable places to allow mobile users to recharge the mobile account, to purchase a mobile number, to purchase a new application, etc.

\* BYC<sup>2</sup> is a comprehensive platform integrating different mobile self-service choices.

**SIM-Key Solution - Manage All Your Accounts in Secure, Easy Way**

Eastcompeace SIM-Key Solution is a SIM-based identity management platform providing SIM Confirmation and SIM Signature services:

**SIM Confirmation**

Based on 3DES encryption mechanism, SIM confirmation service enables subscriber to login Web/WAP/Mobile application service simply with his mobile number.

**SIM Signature**

SIM Signature service enables subscriber to confirm his online payment transaction with the same hardware security level as USB key. By adopting PKI encryption mechanism, SIM signature is more secure and convenient than OTP (One Time Password) SMS as it never transfers encryption key outside SIM card.

SIM-Key Solution not only frees us from the confusion to remember the combinations of name and password, but also secures our online payment and private account information.

**Smart Tracking Solution - Locate The World**

Smart Tracking Solution consists of a device, mobile APP and PC platform. The device holder can be tracked anytime anywhere.

**What does it do?**

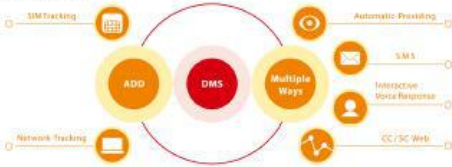

**Smart Tracking System is developed to make our life much easier:**  
 1. In our daily life, it helps protect the young, the old and individual assets.  
 2. In our work, it helps improve efficiency.

## Device Management System

### Smart Setting - An easy access to Mobile Data Provision

With automatic device detection mechanism, Non-OTA & Chinese handset support solution and campaign management feature, Eastcompeace Smart Setting System simplifies the process and enriches the request ways for device configuration service, which enables subscribers to access mobile data service conveniently and efficiently.

### SIM OTA Solution - Manage All Your SIM Over The Air

Eastcompeace OTA system works as a secure gateway between subscriber and MNO (mobile network operator), and enables MNO remotely to modify or update the specified file of (U) SIM or manage SIM card application in an automatic and efficient way.

#### RFM (Remote File Management)

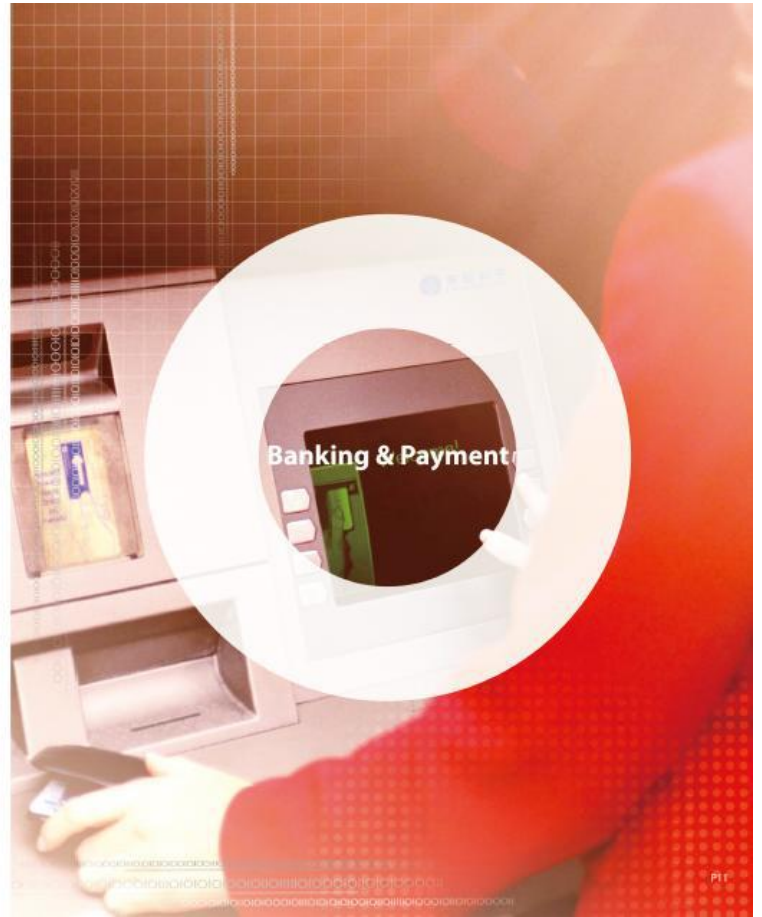

SIM OTA Solution provides subscriber different levels of roaming services by RFM component and seamless roaming experience by a quick update of SMSC number, MNO name, customer care of MNO's roaming cooperater.

**RAM (Remote Application Management)**  
SIM OTA Solution enables subscriber/MNO to do quick installation/activation or removal of all types of Java card applications on SIM.

With campaigns feature, it builds SIM application services quickly in vast quantity of SIM. It also has features such as dynamic STK, advertisement push, balance monitoring, phonebook backup.

P10

P11

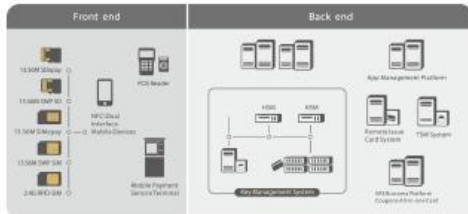

Eastcompeace has been specializing in payment products and technology dedicated to banks and other financial institutions. Eastcompeace payment product portfolio ranges from Magnetic-stripe to EMV card, EMV devices, contactless technology, innovative card designs and printing techniques, and other services based on smart card technology.

Knowing that payment business is customer-oriented, Eastcompeace builds up a service network in 5 countries in order to respond to customers' demand quickly and support customers' services in time. Eastcompeace strives to provide tailored secure and flexible solutions for customers in the payment industry with the belief to facilitate and secure the payment transactions in modern society.

## Mobile Payment System

## Government & Public Sectors

Eastcompeace has been a reliable and trustworthy partner of governments, ministries, national authorities, and corporations for many years. With the great mobility and flexibility brought by internet and mobile network, citizens, corporations, and governments are now under more threats from ID theft, fraud or data disclosure. The mission of Eastcompeace is to offer not only the identification devices but also the best security service to the customers. Eastcompeace combines international standards with country/corporation-specific requirements to protect the identity and data of citizens and employees, to offer the best quality and to provide an end-to-end solution.

### Cards:

National ID Card  
RFID Electronic Label  
Healthcare Card  
Taxation Control Card  
Citizen Card

### Terminals:

Wireless POS Read/Write Terminal  
Bus Self-service Terminal  
Card Issuing System for Hospitals

### Systems:

Card Management System for Access Control  
Key Management System  
Smart Parking System  
One Card Solutions

### One Card Solution - Make Your Life More Convenient

One Card Solution is used to realize different functions such as card issue, door access, attendance, card top-up and consumption with only one card in different scenarios like school, enterprise and government, etc. This solution can be deployed with single function or multiple functions.

#### Use Cases

**Door Access:** glass door, wooden door, revolving door, cylinder door, parking door, visitor management, etc.

**Attendance:** working attendance, school/class attendance, meeting attendance and patrol management, etc.

**Card Payment:** enterprise or school internal consumption (canteen, shop, and parking, subsidies loading), household or government consumption (water fee payment, electronic fee payment), etc.

## Eastcompeace Card Revolution

Eastcompeace develops innovative cards with security features for MNOs, banks and other card issuers to help promote business, improve user experience, and gain brand recognition. Complex multi-stage processes are adopted in production to achieve a high level of artistic and secure effects.
